About Us

Crafting Excellence since 1990.

For the last three decades, our family has been at the heart of India's plastic products industry. From humble beginnings in 1990, we grew to become one of India's most trusted suppliers of high-grade virgin and recycled polymers. We've dedicated our lives to the cycle of renewal, transforming discarded materials into valuable resources for manufacturers across the nation. This isn't just our business; it's our heritage.

We are the experts behind the Industry experts.

We saw this deep, hands-on knowledge of material science as our greatest strength. We asked a simple question: If we create the very building blocks of quality plasticware, why not craft the finished products ourselves? This vision gave birth to Noble Homeware.

We are the next level of our family's legacy, created to take our deep industry expertise directly to the global market
